

Advanced Coil Tubing Technology

With State-of-the-art Coiled Tubing Units (CTU), comprehensive related tools and innovative technical solutions, Anton can meet all the CT applications for the exploration and production.

Leading Scale

20 CTU, 100 auxiliary units and over 200 experienced experts will help you achieve significant operational and economic performance advantages

Advanced equipment

State-of-the-art CTU, well-established design and treatment simulation software are continuously safer and more predictable, efficient, and effective in your CT applications.

Innovative technical solutions

We are capable of providing Innovative technical solutions like shifting the sliding sleeve, abrasive perforating, Drag fracturing, Logging and production. The result: a reliable, customized CT solution that minimizes risk and improves well economics.

Performance

There are more than 20 domestic and international clients including CNPC, Sinopec, Shell, Total, EOG, LUKOIL, BP and Gazprom. Meanwhile, Our CT service performed well in conventional reservoir and unconventional reservoir like shale gas, CBM, tight oil and gas reservoir.

We have done more than 2000 wells of CT operation since 2009. Meanwhile, we set several records in China.

- Abrasive perforating, drilling plug for the first horizontal shale gas well in China.
- Milling plug at the depth of 5800m, which set the deepest depth recording in China.
- Set a new record when millout 19 plugs in a single RIH trip.
- Milling plugs in a 7 inch casing, which set the new record of max casing suitable for CT.
- The first CT service company in Puguang sour gas well
