

Coiled Tubing Abrasive Perforation And StageFRAC Technology

Isolating the bottom-untargeted zone and abrasive perforating at the same time trough the CT, which can realize multiple fracturing in a single trip.

By providing the CT operation, specially designed abrasive perforation tools and fantastic bottom packer, Anton makes a perfect combination of CT operation and operation tools.

Technical feature

- Couninous fracturing through CT increase operation efficienc greatly
- Precious positionand continuous isolationzones
- No need RIH downhole tools in advance, flexible stage setting
- Unlimited number of frac stages , full-bore access

Application

- Casing hole, open hole with packer

Performance

Successful application onmore than 100 wells and totally 1200 frac stages in Sino-pec North China Oilfield , XinjiangOilfiled, Xinan Oilfield, AAGI.
