

Coiled Tubing Conveyance Technology

Our CTU can convey logging tools, downhole video cameras, plugs, perforating gun and cutting tools RIH. Anton can provide CT service and tools in any borehole condition.

Technical Feature

- Convey specific tools to any place where CT string could reach
- E-coil or conventional CT string can be available.
- Fluid pumping and high strength can be apply during RIH and POOH operation.
- Safer, more reliable and efficiency.

Application

Suitable horizontal well, directional well, vertical well, open hole, screen completion.

Performance

Successful application on more than 50 wells, which include 30 wells with wireline logging, 12 wells with memory loggings, 2 wells with plug setting and perforating, 8 wells with cutting operation
